-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,6,7,9,10,11,14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Brownlee (4585004).

Figure 1 of Brownlee shows a cardiac stimulator with a constant voltage source 18B, as well as a recorder 42. Inherent in the pacemaker circuitry 16 is the ability to blank, in order to shield the recorder from pulses. Also, it is well known that pulses are biphasic, in order to allow for the proper polarization of the cells of the heart upon being stimulated.

3. Claim 62 is rejected under 35 U.S.C. 102(b) as being anticipated by Fine et al (5640967).

Col. 17, lines 60+ teach display of amplified cardiac signals in four different modes. The description set forth in Fine is deemed to be encompassed by the term 'processes' as used in the claim.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3762

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 63-66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fine et al.

Biphasic pulses are common in the EP testing field, as are providing constant current pulses. Further, it is considered obvious that various modes can be selected, given the teachings of different modes in columns 17,18 of Fine.

Allowable Subject Matter

6. Claims 2-5,8,12,13,18-20,67-71 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott M. Getzow whose telephone number is (571) 272-4946. The examiner can normally be reached on M-F, 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela Sykes can be reached on (571) 272-4955. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
